ODS² (Oil Delivery System) is a breakthrough Zero Ammonia carrier system that revolutionizes the way active ingredients are delivered to the hair strand:

The cuticle is enveloped in a layer of protective oil-based formula, allowing for active ingredients to be propelled into the cortex.

Hair is 2X fortified*, with multi-dimensional color and stunning shine.

A mixture of DYES, OIL and PROTEIN **EXTRACTS** surrounds hair's cuticle

ODS² propels **DYES** and **PROTEIN EXTRACTS** into the cortex

2. PROPEL

The hair strand is 2X FORTIFIED* and infused with MULTI-DIMENSIONAL

Mix these pure tones with any Chromatics shade to create customized color effects.

PRE-SERVICE STEPS

PRE-SERVICE BEST PRACTICES

Before you begin any chemical service...

- Precisely follow package instructions for haircolor, lightener and texture products
- Wear suitable gloves for all applications
- Perform necessary patch tests as outlined in the directions
- Utilize protective smocks or capes for you and your clients during the service

SKIN ALLERGY TEST

PERFORM A SKIN ALLERGY TEST 48 HOURS BEFORE EACH USE OF THIS PRODUCT, AS ALLERGIES CAN DEVELOP SUDDENLY, EVEN THOUGH YOUR CLIENT HAS PREVIOUSLY USED A HAIRCOLOR PRODUCT FROM THIS **BRAND OR ANOTHER.**

If your client has a tattoo, the risk of an allergic reaction may be increased.

SKIN ALLERGY TEST INSTRUCTIONS

- Use soap and water to clean an area the size of a quarter in the bend of your client's elbow. Pat dry.
- Using a plastic utensil, mix 1 part Chromatics to 1 part 20 volume Oil in Cream Developer in a plastic or glass container. Tightly recap the hair colorant and developer. Do not use metal utensils.
- Apply mixture to the test area with a cotton swab or ball.
- Let test spot dry. Instruct client not to wash, cover or disturb for 48 hours.
- Instruct client to examine test area periodically over the next 48 hours. If he/she experiences any reactions such as redness, burning, itching, swelling, skin abrasions, eruptions or irritation in or around the test area, DO NOT COLOR YOUR CLIENT'S HAIR UNTIL HE OR SHE HAS CONSULTED A DOCTOR.

STRAND TEST

Chromatics may be readily accepted by porous hair that has been chemically treated or damaged from environmental exposure or heat styling. Always conduct a preliminary strand test to determine how the hair will accept color. Apply **Chromatics** to a small section of hair and process 35 minutes; adjust the formula accordingly.
